

LEO Energy has been one of the leading supplier of batteries and energy storage systems for defence projects. Our custom designed energy storage solutions and chargers lead the way in advanced cutting edge military projects. With over 20 years of experience, LEO products will give your project an extreme high energy density with the safety and performance you expect.

Our energy systems include:

- Highest energy density for longer play times (170Wh/kg)
- High power and current capabilities (7C – 35C rates)
- Wide variety of series and parallel configurations
- Lightest weight (1/3 that of NiMH or NiCD)
- Better temperature performance
- Safer Chemistry (Dry electrolyte)
- Mil Spec Vessels
- Waterproof / Drop Proof
- USB/WiFi Communicatable
